- **Safe** - can be sawn or cut indoors.
- **Quicker to install** - all profiles\* can be direct fixed to frame.
- **Reliable** - Voted Number 1 'Most Trusted Brand' of Architecture and Design 2016, and category winner in 'External Wall Materials.'

# The right choice

When you purchase Weathertex you are buying from an ethically sound company that supports local jobs and our environment, all the while creating a brilliant product we believe in. Now that's something to get behind... naturally.

Weathertex is a manufacturer of natural Australian hardwood Weatherboards and Architectural Panels. Our products are made in NSW, at the original 1939 factory using a unique process found nowhere else in the world.

## Most Trusted Brand

Weathertex is proud to announce being voted Australia's Number 1 Most Trusted Brand in 2016, in the Architecture and Design annual 'Top Trusted Brand' survey. With over 341 nominated brands and over 13,000 votes, this survey reveals Australia's top brands within the architecture, building, construction and design industries. Weathertex also won Number 1 Most Trusted Brand Winner in the 'External Wall Materials' category.

## Our 'Green' Accreditations

100% Australian owned and manufactured, Weathertex uses certified state forest or private hardwoods from controlled sources. Proud and determined to promote environmental and sustainable performance measures, we have worked hard to ensure our products are third party accredited. Weathertex has been through a rigorous life-cycle evaluation from Global GreenTag to determine our "green performance" and we are proud to announce we have the FIRST GLOBAL manufactured product to receive a Platinum certification with a GreenRate Level A for our Natural products, and Gold Certification for all our flat primed profiles.

Weathertex has been recently added to the International Living Future Institute Declare Label database. Declare is a voluntary program aiming to transform the building materials industry towards healthier products. The labelling answers three important questions - Where does a product come from? What is it made of? Where does it go at the end of its life?

Global GreenTag International have designed a Product Health Declaration (PhD) to assess chemical hazards of each ingredient throughout the product lifecycle, and the risk associated with exposure and handling. We have been assessed using this system in an attempt to be even more transparent with our customers in regards to the safety of our products.

Have you heard of the Programme for the Endorsement of Forest Certification, or PEFC? The Programme is an international non profit, non-governmental organization dedicated to promoting Sustainable Forest Management through independent third-party certification. With over 30 endorsed national certification systems and more than 240 million hectares of certified forests, PEFC is the world's largest forest certification system. PEFC works through the entire forest supply chain promoting good forest practices and ensuring products are produced following the highest ecological, social and ethical standards.
